Response to Amendment

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6-14 and 17-21 are rejected under 35 U.S.C. 102(e) as being anticipated by the Webber, Jr. patent (6,167,378). The Webber, Jr. patent discloses a method and the associated apparatus for dynamic adaptation of a system in accordance with a contract with criteria associated therewith, the method comprising:

governing an interaction between a plurality of components utilizing the criteria of the contract, the components including an intrusion detection module (col. 5, lines 4-15 and col. 8, lines 59-65);

determining whether the interaction between the components meets the criteria (col. 7, lines 21-6 and col. 9, lines 53-56);

adapting the interaction between the components upon the criteria of the contract not being met (col. 12, lines 5-11 – deviation resolution and col. 15, lines 29-37);

the interaction between the components is adapted by adjusting the contract (col. 6, lines 37-67 and col. 7, lines 21-26);

Art Unit: 3624

the contract is adjusted by a method selected from the group consisting of deactivation of the contract, modification of the contract, deletion of the contract, and activation of a different contract (col. 8, lines 65-67);

the contract including a cost model criteria (col. 13, lines 24-28 and col. 14, lines 4-24);

the criteria is based on performance and service provisioning (col. 14, lines 4-24);

the interaction being governed and adapted is a security-related interaction or a performance-related interaction (col. 14, lines 4-24 and col. 15, lines 29-37); and

the components including the intrusion detection module and an analysis module (col. 14, lines 4-24 and col. 15, lines 25-43).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Webber, Jr. patent, as applied above, and further in view of the Bigus patent (5,74,652). The Webber, Jr. patent discloses all the elements of the presently claimed invention, however the combination still lacks the cost model criteria being based on resource utilization. The Bigus '652 patent teaches the cost model criteria being based on resource utilization (col. 1, lines 42-48). It would have been obvious to one of ordinary skill in the art at the time the invention was

Art Unit: 3624

made to have modified the Webber, Jr. method with the teaching of the cost model criteria of the Bigus '652 patent so as to economically maximize the effectiveness of the computer system.

Remarks

Upon further search and evaluation, the Examiner has cited new art in the present rejection of the claims, as such, any previous indication of allowability of claims 1-21 is withdrawn as it is no longer proper in view of the above stated rejections.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Dan patent is directed to a service contract for managing service systems. The Hyman et al. patent is for an apparatus and method of composing a plan of flexible benefits. And the Fukui patent is for a method of managing contracts for licensed program use and for the associated management system.
